

PRESS RELEASE

Turku, August 05th 2021

The V Meeting of Peruvian Scientists in Europe -SINAPSIS 2021- will take place in Turku, Finland from 21 to 23 of October (virtual meeting). Sinapsis is a space of scientific discussion that aims to facilitate the collaboration and networking among researchers, and functions as a mechanism to strengthen the connections with academics and the academic world in Peru (<https://www.sinapsis-peru.org>). During previous years, the meeting hosted over 100 Peruvian and international scientists who are conducting research in various fields of knowledge such as biology, chemistry, physics, mathematics, engineering, among others. Since Sinapsis 2021 has an online format, we expect a larger number of participants.

In this edition of Sinapsis, we are organizing plenary sessions led by renowned Peruvian and international researchers based on European universities and research centers who maintain close academic collaboration with Peruvian scientists. In addition to these, there will be a series of oral presentations and posters covering a wide array of scientific fields. Round tables addressing relevant topics of interest such as global warming, natural resources management, food industries, among others, will also take place during the meeting. Information regarding available sources of funding for researchers such as Horizon 2020, Marie Skłodowska-Curie and ERASMUS will be provided to all attendees. We recognize the fundamental role of science and technology in the development of the nation and wish scientists and general public alike join this event.

Sinapsis is a free event for all participants thanks to the Division of Science of the Peruvian Ministry of Foreign Affairs and the Embassy of Peru in Finland. The meeting also has institutional support from the University of Turku as well as sponsorship from several Peruvian and international companies.

The event will be transmitted through the Zoom platform.
